

Secret Ice Cream Dream

You didn't know this, but your school's basement is an ice cream factory. That's where _____ and _____
 _____ go every day after school. _____ and _____ caught _____ eating _____
 _____ ice cream. Now _____ and _____ have to share!

1. _____ mixes new _____ ice cream. _____ divides a pint into 3 parts for _____,
 _____ and _____. What fraction does each kid get to eat?

2. _____ shows off the _____ ice cream with _____ in it. If _____ cuts the pint in
 half, then cuts each half in half, how many equal parts are there now? What fraction of a pint is each?

3. That giant bowl of _____ ice cream is actually _____ flavored. _____ eats $\frac{1}{2}$ the bowl,
 and _____ eats $\frac{1}{6}$ of the bowl. What fraction of the bowl do they eat in total?

4. _____ makes a milkshake with the _____ ice cream, then pours out $\frac{1}{3}$ for _____ and
 $\frac{1}{3}$ for _____. What fraction is left in _____'s shaker?
